

Addition and Subtraction Key Stage 1 to Key Stage 2

KS1	<p>Pupils should practise addition to 20 and within to become increasingly fluent. They should use the facts they know to derive others, e.g using $7 + 3 = 10$ to find $17 + 3 = 20$, $70 + 30 = 100$</p> <p>They should use concrete objects and practical apparatus, such as bead strings and number lines to explore additions including missing numbers. Use pictorial representations such as bar models and whole part diagrams to show additive relationships.</p> <p>100 squares could be used to explore patterns in calculations such as $74 + 11$, $77 + 9$ encouraging children to think about 'What do you notice?' where partitioning or adjusting is used.</p> <p>Pupils should learn to check their calculations, by using the inverse.</p> <p>They should continue to see addition as both combining groups and counting on.</p> <p>They should use Dienes to model partitioning into tens and ones* and learn to rearrange numbers in different ways e.g. $23 = 20 + 3 = 10 + 13$.</p> <p>Show understanding that adding zero leaves a number unchanged.</p>					
Year	3 Addition			4 Addition		
Layers of vocabulary  Appendix 1a Beck's Tiers of Vocabulary Appendix 1b: Vocabulary book	Basic to subject specific (Beck's Tiers): +, add, addition, more, plus make, sum, total altogether score double, near double one more, two more... ten more... one hundred more how many more to make...? how many more is... than...? how much more is...?			Basic to subject specific (Beck's Tiers): add, addition, more, plus, increase sum, total, altogether score double, near double how many more to make...?		
	Instructional vocabulary: explain your method explain how you got your answer give an example of... show how you... show your working			Instructional vocabulary: calculate, work out, solve investigate, question answer check		
NC 2014	Add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction.			Add and subtract numbers with up to 4 digits using the formal written method of columnar addition and subtraction where appropriate. Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.		
Developing Conceptual/ Procedural Understanding	Near doubles $13+14 =$ Double $13 = 26$ $26+1 = 27$ or Double $14 = 28$ $28-1 = 27$ Using known facts $40 + 80 = 120$ using $4 + 8 = 12$ So $400 + 800 = 1200$	Start with least significant digit $\begin{array}{r} 67 \\ + 24 \\ \hline 11 \end{array}$ $11 (7+4)$ $+ 80 (60+20)$ $\hline 91$ "7 add 4 equals 11 and 60 add 20 equals 80. 1 + 0 = 1 and 1 ten + 8 tens = 9 tens"	Columnar addition $\begin{array}{r} 625 \\ + 48 \\ \hline 673 \\ \hline 1 \end{array}$ Teach the carried digit.	Using known facts $40 + 80 = 120$ using $4 + 8 = 12$ So $400 + 800 = 1200$ and $4000+8000=12,000$ Remodelling strategy $3548 + 1998$ $3546 + 2000 = 5546$ Place value materials to	Columnar addition $\begin{array}{r} 587 \\ + 475 \\ \hline 1062 \\ \hline 11 \end{array}$ "7 add 5 equals 12. That's 2 ones and 1 ten to carry over. 8 add 7 equals 15 and the 1 ten to carry makes 16. That's 6 tens and 100 to carry over. 500 add 400 equals 900	Columnar addition (decimals) in contexts such as money and measurement $\begin{array}{r} 12.45 \\ 7.36 \\ + 24.50 \\ \hline 44.31 \\ \hline 111 \end{array}$ Representing problems There are 259 more boys than girls

Addition and Subtraction Key Stage 1 to Key Stage 2

	<p>Remodelling strategy $243 + 198$ $241 + 200 = 441$</p> <p>Place value materials to represent 3 digit numbers Base 10 and then place value counters.</p>  	<p>"6 tens add 2 tens equals 8 tens"</p>   <p> 625 $+ 48$ $13 (5+8)$ $60 (20 + 40)$ $+600 (600 + 0)$ 673 </p> <p>All language in the context of the place value and added in columns, lining up the digits.</p> <p>Teaching point: no more than 9 in any given column following regrouping.</p>	<p>Representing problems There are 334 children at Springfield School and 75 at Oak Nursery. How many children are there altogether?</p>	<p>represent calculations</p>	<p>and the 1 hundred to carry makes 1000"</p> <p> 7648 $+1486$ $14 (8+6)$ $120 (40+80)$ $1000 (600+400)$ $+ 8000 (7000+1000)$ 9134 </p> <p> 7648 $+ 1486$ 9134 111 </p>	<p>in Lucy's school. If there are 759 girls, how many pupils are there altogether?</p> 
Known facts	Derive and use addition and subtraction facts to 100, e.g. $33 + 67 = 100$.			Derive and use addition and subtraction facts (for multiples of 10) to 1000, e.g. $330 + 670 = 1000$.		
Essential knowledge	Add single digit bridging through boundaries	Add multiples of 10, 100		Fluency of 2 digit + 2 digit		Add multiples of 10, 100 and 1000
	Partition second number to add	Pairs of 100 (complements of 100)		Partition second number to add		Decimal pairs of 10 and 1
	Use near doubles to add	Add near multiples of 10 and 100 by rounding and adjusting		Use near doubles to add		Adjust both numbers before adding
	Partition and recombine			Add near multiples		Partition and recombine

Addition and Subtraction Key Stage 1 to Key Stage 2

Year	5 Addition		6 Addition	
Layers of vocabulary  Appendix 1a Beck's Tiers of Vocabulary Appendix 1b: Vocabulary book	Basic to subject specific (Beck's Tiers): add, addition, more, plus, increase sum, total, altogether score double, near double how many more to make...?		Basic to subject specific (Beck's Tiers): add, addition, more, plus, increase sum, total, altogether score double, near double how many more to make...?	
	Instructional vocabulary: put, place arrange, rearrange change, change over split, separate		Instructional vocabulary: put, place arrange, rearrange change, change over adjusting, adjust split, separate carry on, continue, repeat what comes next? predict describe the pattern, describe the rule find, find all, find different investigate	
NC 2014	Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction). Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.		Solve problems involving addition, subtraction, multiplication and division.	
Developing Conceptual/ Procedural Understanding	Columnar addition Include calculations involving more than 2 numbers and carrying figures >1. $\begin{array}{r} 25567 \\ 16397 \\ +15984 \\ \hline 57948 \\ 1\ 1\ 2\ 1 \end{array}$ Include calculations with 'empty columns'. $124.9 + 7.25$ $\begin{array}{r} 124.90 \\ +\ 7.25 \\ \hline 132.25 \\ 1\ 1 \end{array}$	Representing problems If 2541 is the answer, what's the question? - Can you create three addition calculations? - Can you create three subtraction calculations? - Did you use a strategy?	Columnar addition Include calculations with up to 3 'empty columns'. $128.7 + 3.014$ $\begin{array}{r} 128.700 \\ +3.014 \\ \hline 131.714 \\ 1 \end{array}$	Representing problems 7208 females attended a concert as well as 8963 males. There were originally 20000 seats on sale. How many empty seats were there at the concert?
Known facts	Derive and use addition and subtraction facts to 10 and 1, e.g. $3.3 + 6.7 = 10$ and so $0.33 + 0.67 = 1$.		All the KS2 required facts	
Essential knowledge	Fluency of 2 digit + 2 digit including with decimals	Add multiples of 10, 100, 1000 and tenths	Fluency of 2 digit + 2 digit including with decimals	Add multiples of 10, 100, 1000, tenths and hundredths
	Partition second number to add	Use number facts, bridging and place value	Partition second number to add	Use number facts, bridging and place value

Addition and Subtraction Key Stage 1 to Key Stage 2

	Adjust numbers to add	Partition and recombine	Adjust numbers to add	Partition and recombine		
KS1	Pupils should practise subtraction to 20 and within to become increasingly fluent. They should use the facts they know to derive others, e.g using $10 - 7 = 3$ and $7 = 10 - 3$ to calculate $100 - 70 = 30$ and $70 = 100 - 30$. Know the effect of zero. As well as number lines, 100 squares could be used to model calculations such as $74 - 11$, $77 - 9$ or $36 - 14$, where partitioning or adjusting are used. Pupils should learn to check their calculations, including by adding to check. They should continue to see subtraction as both take away and finding the difference and should find a small difference by counting up. They should use Dienes to model partitioning into tens and ones* and learn to partition numbers in different ways e.g. $23 = 20 + 3 = 10 + 13$.					
Year	3 Subtraction		4 Subtraction			
Layers of vocabulary  Appendix 1a Beck's Tiers of Vocabulary Appendix 1b: Vocabulary book	Basic to subject specific (Beck's Tiers): subtract, subtraction, take (away), minus leave, how many are left/left over? one less, two less... ten less... one hundred less how many fewer is... than...? how much less is...? difference between half, halve = equals, sign, is the same as tens boundary, hundreds boundary exchange, carried digits Instructional vocabulary: explain your method explain how you got your answer give an example of... show how you... show your working		Basic to subject specific (Beck's Tiers): subtract, subtraction, take (away), minus, decrease leave, how many are left/left over? difference between half, halve how many more/fewer is... than...? how much more/less is...? equals, sign, is the same as tens boundary, hundreds boundary, inverse exchange, carried digits Instructional vocabulary: calculate, work out, solve investigate, question answer check			
NC 2014	Add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction. Least significant digit is always dealt with first to establish if the exchange is needed.		Add and subtract numbers with up to 4 digits using the formal written method of columnar addition and subtraction where appropriate. Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.			
Developing Conceptual/ Procedural Understanding	Subtract mentally pairs of multiples of 100 using known facts $600 - 200 = 400$ because $6 - 2 = 4$ Remodelling strategy (keeping the difference the same) $502 - 198$ $504 - 200 = 304$ Re-arranging Use of apparatus to	Start with least significant digit - decomposition $\begin{array}{r} 81 = 80 \quad 1 \\ - 57 \quad 50 \quad 7 \\ \hline \end{array}$ $\begin{array}{r} 81 = 70 \quad 11 \\ - 57 \quad 50 \quad 7 \\ 24 \quad 20 \quad 4 \end{array}$ "1 subtract 7 is tricky so I will rearrange 81 into 70 and 11. 11 subtract 7 equals 4 and 70 subtract	Columnar subtraction $\begin{array}{r} 814 \\ - 286 \\ \hline 468 \end{array}$ Emphasis on language of place value, i.e. 14 ones subtract 6 ones, 14 tens subtract 8 tens, and 6 hundreds subtract 2 hundreds.	Subtract mentally pairs of multiples of 1000 using known facts $6000 - 2000 = 4000$ because $6 - 2 = 4$ Remodelling strategy (keeping the difference the same) $3548 - 1998$ $3550 - 2000 = 1550$ Find the difference strategy $136 - 28 =$	Columnar subtraction $\begin{array}{r} 2344 - 187 \\ 2344 \\ - 187 \\ \hline 2157 \end{array}$ $\begin{array}{r} 6467 - 2684 \\ 6467 \\ - 2684 \\ \hline 3783 \end{array}$ Columnar subtraction	Representing problems Check the answer to the following calculations using the inverse. Show all your working.

Addition and Subtraction Key Stage 1 to Key Stage 2
