| :---: | :---: | :---: | :---: | :---: | :---: |
| 1. | Number and place value: <br> Count in multiples, order and compare beyond 1000, Number sense | Knows the relative position of numbers. Knows zero as a place holder in three-digit numbers. <br> Knows the rules of rounding. | Knows the number system from zero into negative numbers. <br> Knows a variety of representations and is fluent in the order and place value of numbers beyond 1000 , including counting in tens and hundreds. Knows how to maintain fluency in other multiples. | - To count from 0 in multiples of 4, 8, 50 and 100, finding 10 or 100 more or less than a given number. <br> - To recognise the place value of each digit in a three-digit number (hundreds, tens, ones). <br> - To compare and order numbers up to 1000. <br> - To identify, represent and estimate numbers using different representations. <br> - To read and write numbers up to 1000 in numerals and in words. <br> - To solve number problems and practical problems involving these ideas. | - To count backwards through zero to include negative numbers. <br> - To recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones). <br> - To identify, represent and estimate numbers using different representations. <br> - To order and compare numbers beyond 1000 . <br> - To round any number to the nearest 10,100 or 1000. <br> - To count in multiples of $6,7,9,25,1000$. <br> - To find 1000 more or less than a given number. |
| Links to resou $\qquad$ 900 <br> 1100 <br> 900 <br> Round to the nearest 10, look at the unit digit $0-4 \text { down }$ $5-9 \text { up }$ | policy documents: |  |  |  | Say whether each number on the number line is closer to 500 or <br> Round 535,556 and 568 to the nearest 100 <br> Use the stem sentence: $\qquad$ rounded to the nearest 100 is $\qquad$ <br> Complete these number sequences: <br> 6, $\qquad$ 18 , $\qquad$ $\qquad$ , 36 <br> 7 . $\qquad$ 28, $\qquad$ . 42, $\qquad$ 56 <br> १, 18 , $\qquad$ . 36, $\qquad$ , 54. $\qquad$ $\qquad$ 81 <br> 0 $\square$ $\square$ $\square$ $\text { 150 } 175$ $\square$ $]_{225}$ $\square$ |
| 2. | Addition and subtraction: Mental strategies | Knows efficient mental strategies including partitioning and adjusting for addition and subtraction. | Knows efficient mental strategies including partitioning and adjusting for addition and subtraction. | - To add and subtract numbers mentally, including: <br> - a three-digit number and ones <br> - a three-digit number and tens <br> - a three-digit number and hundreds. <br> - To solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. | - To estimate and use inverse operations to check answers to a calculation; <br> - To solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. |
| Links to calcul $\begin{aligned} & 400+\square= \\ & 400+\square= \\ & 400+\square= \end{aligned}$ <br> 500 - $\square$ <br> 500 - $\square$ $=$ <br> 500 - $\square$ $1=2$ | cy mental methods: $\begin{array}{ll} 376+4 & 695+8 \\ 376+20 & 695+3 \\ 376+400 & 695+6 \end{array}$ |  |  | Correct the mistake Which of these <br> $670+30=700$ equations does 65 <br> $670+\square=750$, so the fit into to make it <br> missing value is 70.  <br>   <br> correct. Correct the mistake  <br> $940-60=880$ $325+\square=390$ <br> $940-\square=780$, so $640-\square=575$ <br> the missing value is $795=740+\square$ <br> 190.  |  |

|  |  |  |  |  |  |
| 3. | Addition and subtraction: Estimations and accuracy written methods | Knows how to calculate with columnar methods regrouping the tens and exchanging in subtraction. | Knows how to check the accuracy of addition and subtraction calculations | - To add and subtract numbers with up to three digits, using the efficient written methods of columnar addition and subtraction. <br> - To estimate the answer to a calculation and use inverse operations to check answers. <br> - To solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. | - To add and subtract numbers with up to four digits using the efficient written methods of columnar addition and subtraction where appropriate. <br> - To estimate and use inverse operations to check answers to a calculation. <br> - To solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. <br> - To estimate, compare and calculate different measures, including money in pounds and pence. |
| Links to calculatio <br> Columnar addition $\begin{array}{r} 625 \\ +\quad 48 \\ \hline 673 \\ \hline 1 \end{array}$ <br> Regroup the 10 | cy expanded and comp <br> Columnar subtraction | t methods. $\begin{aligned} & \text { Which method? } \\ & 400+300 \\ & 600-200 \\ & 492+36 \\ & 492-236 \end{aligned}$ |  |  | a) To calculate an approximate answer to $46929-21285$, round each number to the nearest 1000 . $\begin{aligned} & 46929-21285 \\ & \square-\square=\square \end{aligned}$ <br> b) Work out the accurate answer $46929-21285=$ $\square$ |
| 4. | Multiplication and division: <br> Table facts Multiplying by 10 | Knows the 2, 3, 4-and 8 -times tables and the doubling patterns, odds and evens. Knows how to multiply using partitioning. Knows how to find corresponding division facts. | Knows and applies table facts for recall of multiplication and division facts when calculating. | - To recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables. <br> - To explain the effect of multiplying by 10 and multiples of 10 <br> - To write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental methods. <br> - To solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which $n$ objects are connected to $m$ objects | - To recall multiplication facts for multiplication tables up to $12 \times$ 12. <br> - To use place value, known and derived facts to multiply and divide mentally, including multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers. <br> - To solve problems involving multiplying and adding, including using the distributive law and harder multiplication problems such as which $n$ objects are connected to $m$ objects. |

| :---: | :---: | :---: | :---: | :---: | :---: |
| 6. | Measurement: measuring accurately in the correct units Converting between units of measures | Knows how to measure accurately reading the marked divisions in the appropriate units | Knows how to use multiplication to convert from larger to smaller units. | -To measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass (kg/g); volume/capacity ( $1 / \mathrm{ml}$ ) | - To convert between different units of measures (for example km to $m$, hour to minute) |
|  |  |  |  | $\square$ <br> Mark the scale in divisions of 100 g | 1. Complete the statements about measures. <br> a) 5 kilometres $=$ $\qquad$ metres <br> d) 2 grams $=$ $\qquad$ milligrams <br> b) 3 metres $=$ $\qquad$ centimetres <br> e) $\qquad$ kilograms $=2400$ grams <br> c) 8.5 centimetres $=$ $\qquad$ millimetres <br> f) 6 litres $=$ $\qquad$ millilitres |
| 7. | Geometry; Describing and classifying shapes including angles | Know and recognise right angles in 2d shapes. <br> Knows acute and obtuse in relation to right angles. Knows how to describe lines using mathematical terms | Knows how to identify acute and obtuse angles. Knows that two right angles form a straight line. | - To recognise angles as a property of shape and associate angles with turning. <br> - To identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle. <br> - To identify horizontal, vertical, perpendicular and parallel lines in relation to other lines. | - To compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes. <br> - To identify lines of symmetry in 2 D shapes presented in different orientations. <br> - To complete a simple symmetric figure with respect to a specific line of symmetry. <br> - To identify acute and obtuse angles and compare and order angles up to two right angles by size. |
|  |  |  |  |  | Use the criteria to describe the shapes. |

| :---: | :---: | :---: | :---: | :---: | :---: |
| 10. | Fractions: representing, comparing and ordering unit non unit fractions. Adding and subtracting unit/non unit fractions. | Knows how to add and subtract within the same denominator. | Knows how to add and subtract fractions with the same denominator. | - To recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators. <br> - To recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators. <br> - To compare and order unit fractions, and fractions with the same denominators. <br> - To add and subtract fractions with the same denominator within one whole $(5 / 7+1 / 7=6 / 7) .$ <br> - To solve problems that involve all of the above. | - To add and subtract fractions with the same denominator. <br> - To solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number. |
| $\frac{1}{4}+\frac{3}{4}=\frac{4}{4}$ | $\frac{6}{10}-\frac{3}{10}=\frac{3}{10}$ |  | $\frac{3}{7}=\frac{5}{7}$ | Write three fraction equations for this model. <br> True or false? <br> Answer $\begin{array}{ll} \frac{3}{8}+\frac{4}{8}= & \frac{5}{6}+\frac{2}{6}=\frac{7}{12} \\ \frac{5}{7}-\frac{2}{7}= & \frac{13}{20}-\frac{3}{20}=\frac{1}{2} \end{array}$ | $\begin{array}{ll} \begin{array}{ll} \text { a) } \frac{1}{3}+\frac{2}{3}= \\ \text { b) } \frac{5}{7}-\frac{2}{7}= & \text { d) } \frac{2}{5}+\frac{2}{5}= \\ & \text { a) } \frac{1}{2}+\frac{5}{4}-\frac{1}{4}= \\ \text { b) } \frac{4}{5}+\frac{3}{10}= \end{array} \end{array}$ |
| 11. | Fractions; Solving problems and decimals | Knows that tenths occur when an object or number is divided into 10 equal parts. | Knows how to write decimal equivalents of any number of tenths and hundredths | - To count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10 ; | - To recognise and write decimal equivalents of any number of tenths or hundredths. <br> - To recognise and write decimal equivalents to $\frac{1}{4}, \frac{1}{2}, \frac{3}{4}$ <br> - To find the effect of dividing a one- or two-digit number by 10 and 100 , identifying the value of the digits in the answer as units, tenths and hundredths. <br> - To round decimals with one decimal place to the nearest whole number. <br> - To compare numbers with the same number of decimal places up to two decimal places. |
