Week.	Mathematical aspect	Non-negotiable end points Year 5.	Non-negotiable end points Year 6	Curriculum statements – Year 5.	Curriculum Statements. Year 6.															
4.	Geometry: position and direction all four quadrants	Knows how to describe a translation or reflection of a shape, including reference to the axes in the first quadrant.	Knows how to draw and label a pair of axes in all four quadrants with equal scaling, including the use of negative numbers.	<ul style="list-style-type: none"><li>To identify, describe and represent the position of a shape following a reflection or translation using the appropriate language, and know that the shape has not changed.</li></ul>	<ul style="list-style-type: none"><li>To describe positions on the full co-ordinate grid (all four quadrants). Including on blank axis.</li><li>To draw and translate simple shapes on the co-ordinate plane and reflect them in the axes.</li></ul>															
<p>Object A is reflected in the mirror line to give image B. Write the coordinates of the vertices for each shape.</p> <div><table><tr><th></th><th>Original Coordinate</th><th>Reflected Coordinate</th></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></table></div>					Original Coordinate	Reflected Coordinate													<div><p>This right-angled triangle is translated <b>right 6, down 3.</b></p><p>Draw the triangle in its new position.</p></div>	<div><p>Layla draws a square on this coordinate grid. Three of the vertices are marked.</p><p>Reflect Shape A in the y axis.</p><p>Write the co-ordinates of the vertices of your new shape.</p></div> <div><p>What are the coordinates of the missing vertex?</p><p>( , )</p></div>
	Original Coordinate	Reflected Coordinate																		
5.	Fractions: calculating	Knows how to convert fractions to a common denominator for addition and subtraction.	Knows how to calculate with fractions. Knows that dividing by 2 is the same as multiplying by $\frac{1}{2}$ .	<ul style="list-style-type: none"><li>To recognise mixed numbers and improper fractions and convert from one form to the other; write mathematical statements <math>&gt; 1</math> as a mixed number.</li><li>To add and subtract fractions with the same denominator and multiples of the same number</li></ul>	<ul style="list-style-type: none"><li>To add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.</li><li>To multiply simple pairs of proper fractions, writing the answer in its simplest form.</li><li>To divide proper fractions by whole numbers.</li></ul>															
<p>Links to resources and policy documents:</p> <div><p><math>\frac{1}{2} \times \frac{2}{3} = \frac{2}{6} = \frac{1}{3}</math></p><p>Convert the mixed numbers to improper fractions to calculate:</p><math display="block">4\frac{4}{5} - 1\frac{9}{10} = 2\frac{1}{7} - 1\frac{1}{3} = 3\frac{5}{12} - 1\frac{7}{9} = 3\frac{5}{11} - 1\frac{4}{5} =</math></div> <div><p><math>\frac{1}{4} \div 2</math> We know this is the same as: <math>\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}</math></p><p>Now it's your turn!</p><math display="block">\frac{1}{5} \div 2 = \frac{1}{5} \times \frac{1}{2} = \frac{1}{10}</math><math display="block">\frac{1}{6} \div 3 = \frac{1}{6} \times \frac{1}{3} = \frac{1}{18}</math><math display="block">\frac{3}{11} \div 4 = \frac{3}{11} \times \frac{1}{4} = \frac{3}{44}</math></div>				<p>Eva has a full tin of paint. She uses <math>\frac{1}{3}</math> of the tin on Friday, <math>\frac{1}{21}</math> on Saturday and <math>\frac{2}{7}</math> on Sunday. How much paint does she have left?</p> <p>Tommy is adding mixed numbers. He adds the wholes and then adds the fractions. Then, Tommy simplifies his answer.</p> $1\frac{1}{2} + 2\frac{1}{6} = 1\frac{3}{6} + 2\frac{1}{6} = 3\frac{4}{6} = 3\frac{2}{3}$ <p>Use Tommy's method to add the fractions.</p> $3\frac{1}{2} + 2\frac{3}{8} = 34\frac{1}{9} + 5\frac{2}{5} = 12\frac{5}{12} + 2\frac{1}{7} =$	<p>Whitney is calculating <math>\frac{5}{8} + \frac{3}{16}</math></p> <p>She finds the lowest common multiple of 8 and 16 to find a common denominator.</p> <p>LCM of 8 and 16 is 16 <math>\frac{5}{8} = \frac{10}{16}</math> <math>\frac{10}{16} + \frac{3}{16} = \frac{13}{16}</math></p> <p>Use this method to calculate:</p> $\frac{1}{3} + \frac{2}{9} = \frac{3}{7} + \frac{7}{21} = \frac{8}{15} + \frac{1}{5} = \frac{3}{16} + \frac{3}{8} + \frac{1}{4} =$ <p>Use <math>&lt;</math>, <math>&gt;</math> or <math>=</math> to make the statements correct.</p> $\frac{1}{4} \times \frac{1}{2} \bigcirc \frac{1}{4} \times 2$ $\frac{1}{4} \times \frac{1}{3} \bigcirc \frac{1}{4} \div 3$															

Week.	Mathematical aspect	Non-negotiable end points Year 5.	Non-negotiable end points Year 6	Curriculum statements – Year 5.	Curriculum Statements. Year 6.
6.	Fractions: calculating with decimals	Knows that percentages, decimals and fractions are different ways of expressing proportions.	Knows how to multiply and divide numbers with up to two decimal places by one-digit and two-digit whole numbers. Knows multiply decimals by whole numbers in practical contexts, such as measures and money. Knows how to divide decimal numbers by one-digit whole number, in practical contexts involving measures and money.	<ul style="list-style-type: none"><li>To solve problems which require knowing percentage and decimal equivalents of <math>\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}</math> and those fractions with a denominator of a multiple of 10 or 25.</li></ul>	<ul style="list-style-type: none"><li>To multiply one-digit numbers with up to two decimal places by whole numbers.</li><li>To use written division methods in cases where the answer has up to two decimal places.</li><li>To solve problems which require answers to be rounded to specified degrees of accuracy.</li><li>To recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.</li></ul>
Links to resources and policy documents:				let's try some mental multiplication using decimals.	
<div>A jar of sweets weighs 1.213 kg. How much would 4 jars weigh?</div> <div><div><div><div><div></div><div>Sweets</div></div><div><div></div><div>Sweets</div></div><div><div></div><div>Sweets</div></div><div><div></div><div>Sweets</div></div></div></div><div>A boy bought 4 magazines at £1.34 each and 3 birthday cards at £1.65 each.</div><div>How much did he spend?</div><div>£</div></div>				<div>Q12.
